

## Projects co-financed by the EU

Name of product: **Corrosion resistant permanent magnets for demanding applications**

Reg. number: CZ.01.1.02/0.0/0.0/15\_019/0004630

Program: OP PIK Applications - I. Challenge

The subject of the project is the development of a prototype of a corrosion-resistant permanent magnet, prototype development of test equipment, software, and proven technology of permanent magnet bonding.

Filling: The project solves the current problems of the current state of permanent magnets, which are used by domestic manufacturers of permanent magnet devices.

Realization date: 10/2015 – 09/2019
